

## **Pikes Peak International Hill Climb – Results 1930**

The world wide great depression impacted the participants for the Pikes Peak Hill Climb. Only six Open Wheel entries were available in 1930. As the economy improved, so did the participants. By 1937 there were 21 entered in the Pikes Peak Hill Climb.

Racing head conversions for the Model A engines used predominately previously, allowed the newly modified engines to now be contenders with the right driver and chassis package. Ford V-8 engines were used and the Miller engine allowed Louis Unser to power through to a record breaking run up the hill in 1939.

### **Open Wheel**

Car Number	Driver	Make	Finish Time
2	Glen Schultz	Stutz DV-32	18:08.7
15	Louis Unser	Coleman 4WD	18:37.4
13	Robert Mason	Cliff House Special	18:59.4
	Angelo Cimino	Coleman 4WD	23:59.4
4	Jerry Unser	Amsted Special	DF
